Are not serious.

Mr. Bitter was director of sculpture of the Buffalo exposition and chief of the department of sculpture of the St. Louis exposition. He had executed many important private commissions, including the statue of Carl Schurz here and works in the home of Collis P. Huntington, Cornelius Vanderbilt and other wealthy men. Remember, we have a Big Modern Optical other wealthy men. He designed Plant on the premises. It is equipped to make eyeglasses to order.

the Astor gates for Trinity Church here.

He was a member of the National Institute of Arts and Letters and an academican of the National Academy of Design. Mr. Bitter was forty-seven years old, coming here in 1889 from Vienna, where he was born. His home was in this city.

Mr. Bitter made his advent into sculpture as a skilled laborer. He was employed in this capacity by a firm of architictural decorators when he entered a contest for design of the \$200,000 bronze doors at Trinity Church, known as the Astor Memorial Gates. He won the contest and with this money as a foundation opened a small studio and started his career as a sculptor.

TO FINISH 1,000-MILE RUN.

Maxwell "25" Starts on Last Day of Its Utility Test. Today marks the last day of the 1,000

mile utility test of the Maxwell "25." Yesterday the car was put through another strenuous day's work of 159.3 miles, the route being to Rockville. Saithersburg, Cedar Grove, Damascus, Ridgeville, New Market, Frederick, Middletown, Boonsboro and Hagerstown. After the run last evening at 6 o'clock, a total of 855.6 miles had been registered since last Sunday morn. ing. The observers were J. Harry King and H. L. Golladay, two "knights of the grip," and both motor car own

ers.
At 7 o'clock the machine was put into service again, this time at the disposal of electric light officials. The machine was in service all night, and is engaged today in winding up the 1,000 miles. Thursday the observers were W. E. Ballard, E. J. Taylor and William Wallace, telephone officials, who motored to Alexandria, Fairfax, Manassas, Centerville, Greenwich, Warrenton, Belvoir, Marshall, Delaplane, Middleburg, Aldie, Leesburg and Falls Church, a distance of 142.2 miles.

DENIES AN INJUNCTION.

Court Holds Suit for Damages Does Not Bar Realty Sale.

Holding that the mere pendency of a suft for damages is not sufficient reason for a court of equity to restrain the disposition of real estate owned by the defendant, Justice Siddons has sustained a motion to dismiss a bill for infunction filed against Louis Freed-

for injunction filed against Louis Freedman by Harry Friedling. Counsel for the plaintiff noted an appeal.

Friedling sued Freedman to recover \$20,000 damages for alleged alienation of affections, and sought at once to enjoin the disposition of the defendant's property until the court had heard and determined the lawsuit.

Attorneys Tepper and Gusack and John Ridout appeared for the plaintiff. The defendant was represented by Attorneys W. J. Lambert, R. H. Yeatman and F. R. Whippler.

Limited Divorce for Mrs. Manuel. Justice McCoy of the District Sulivorce to Gertrude Manuel from Richgives the custody of the child to the other, and awards her alimony of \$20 per month with counsel fees. Attorneys Edwin Forrest and A. B. Webb appeared for the wife. The husband was represented by Attorney George P. Hoover.

REDFIELD TO ENCOURAGE **VOCATIONAL TRAINING**

Thinks Schools Are Needed to Fit Children to Enter Industrial Fields.

Secretary Redfield hopes to signalize is administration of the Department of Commerce by encouragement and id he intends to give to the project of vocational training, according to a statement made by him to a representative of the southern conference for education and industry to be held at Chattanooga the last week in April. Secretary Redfield believes, according to a statement issued today by the managers of the conference, that there is no more important need in fit boys and girls for industry. Such fitting, he says, would lengthen their productive life by at least ten years, make them more efficient workers, farmers and home builders when they are young and active and eager to learn, by preparing them for the industrial world, the farm and the home.

As fast as th' wo ter a new "musical series of the same and the home." this country than for the schools to

Motor Car Upkeep Under the Microscope

By "Utility Test" 1915 Maxwell

CHAPTER VI.

run up a mileage like that for your Maxwell—when you buy it. The trouble isn't in covering the ground; it's in finding the cause for cover-

But I helped matters out by registering a round 159.3 miles. course, I took the road to do it. Two men wanted to know about Maxwell efficiency by real, first-hand investigation, so I took them together, and, while they were and-

ard, spices, etc.-you know, one o

I've got to hustle, no doubt about | what I took with ease on intermediate and high.

BEATING IT SOME, MAYBE. ro do a good day's work is easy enough for any automobile, a Maxwell "25" especially. But to make seven consecutive days' work total 1,000 miles in length is a stunt in itself.

Take my word for it that you can never invent enough work or play—steady touring alone excepted—to run up a mileage like that for your Maxwell—when you buy it. The trouble isn't in covering the ground; it's in finding the cause for coveriant of the way home Mr. Golladay asked my driver if I was showing my best speed. I don't know whether he was serious or not, but I do know that I felt a foot on my throttle and jumped out like a startled deer. Before we'd gone more than a city block or two I had 45 on my speed-ometer. That isn't a racing clip exactly, but remember that my top and windshield were up. I'll guarantee that you'll never care to drive faster in your Maxwell "25" or any other car.

In your Maxwell "25" or any other car.

While I wouldn't want to say I did it (because you can't always tell what some constables will do), I do know that you can leave Hagerstown at 3:13 and be in Washington at 6:10, and not jar your teeth out, either. Remember, I didn't say I did it; I simply know a Maxwell can do it.

YESTERDAY'S RUN.

ing out for themselves, they were finding out for you, too.

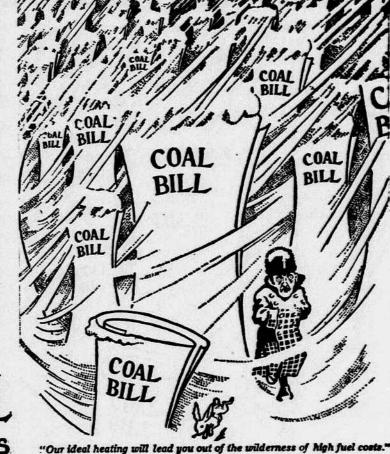

Yesterday your observers were "Knights of the Grip" J. Harry King, representing W. N. Clark Co., fruit and vegetable packers, of Rochester, N. Y., and H. L. Golladay, who represents A. Colburn Co. of Philadelphia, importers of mustard, spices, etc.—you know, one of IN REVIEW

tard, spices, etc.—you know, one of those gingery sort of chaps that's in for anything and ready to be shown. We started at 8:30, and visited Rockville, Gaithersburg, Cedar Grove, Damascus, Ridgeville, New Market, Frederick, Middletown, and once again I had a look at the Blue Ridge—I'll remember this trip for its real beauty, on over the mountains to Boonesboro, Funkstown and Hagerstown without even missing a shot—your observers both agreed that they never rode in any car to equal a MAXWELL—the performance was remarkable, and, mind you, both gentlemen own cars, and the real bit of praise I got was that they admitted their cars could hardly go up on low

Heat that reduces living costs!

The struggles of many a man through life seem like a journey through a howling wilderness of bills which mount so high that he can hardly see the blue sky of living economy. But one of the strangest, reckless habits of running up domestic expense is the way that many people still cling to oldfashioned heating ways which greedily eat up coal and send the heat a-flying up the chimney, rather than distributing it evenly to the rooms to comfort the folks. The only way to get out of that wilderness of self-imposed taxation, and to stay out forever, is by putting in an outfit of coaleconomizing

Big Builders and Real Estate men will tell you that the first question asked in buying or renting is: "How is it heated?" This is because heating is now recognized as most important. IDEAL Boilers and AMERICAN Radiators put new life into old buildings and add a permanent extra selling value to any property, new or old.

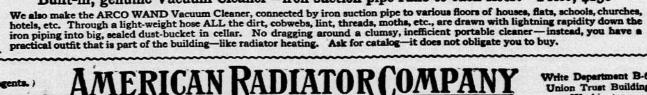

Ever heard of any purchaser of these ideal heating outfits not getting back the full price paid for them when offering his property for sale, or not obtaining 10% to 15% larger rental? Ever heard of a banker who would not promptly loan a larger amount on property thus modernized?

IDEAL Boilers and AMERICAN Radiators are rapidly supplanting all other methods of heating among thinking people who want to save money, and sanitarily heat their home or other building from top to bottomautomatically regulated to produce day and night the exact volume and degree of heat necessary to meet every caprice of the weather-and no fuel waste. IDEAL Boilers burn with greatest success either oil, gas, wood, coke, lignite, hard coal, soft coal - screenings, pea or nut sizes - anything that will burn will be made to yield its full volume of heat.

These outfits are absolutely tight, hence send no coal-gases or ash-dust to living rooms, thereby protecting the health as well as the furnishings. They are a permanent investment. We cordially invite the inquiry of those interested in stores, schools, churches, farm, or city houses, etc. Will gladly send booklets and helpful information without cost or obligation. Iron prices now rule the most attractive in 10 years past and at this season you get the services of the most skillful fitters! Better act now—reduce your cost of living and better the living. Built-in, genuine Vacuum Cleaner-iron suction pipe runs to each floor. Price, \$150 .

Union Trust Building Washington
